
J.M. Sienkiewicz (OPC) and
J.A. Morgan (I.M. Systems Group, Inc.)

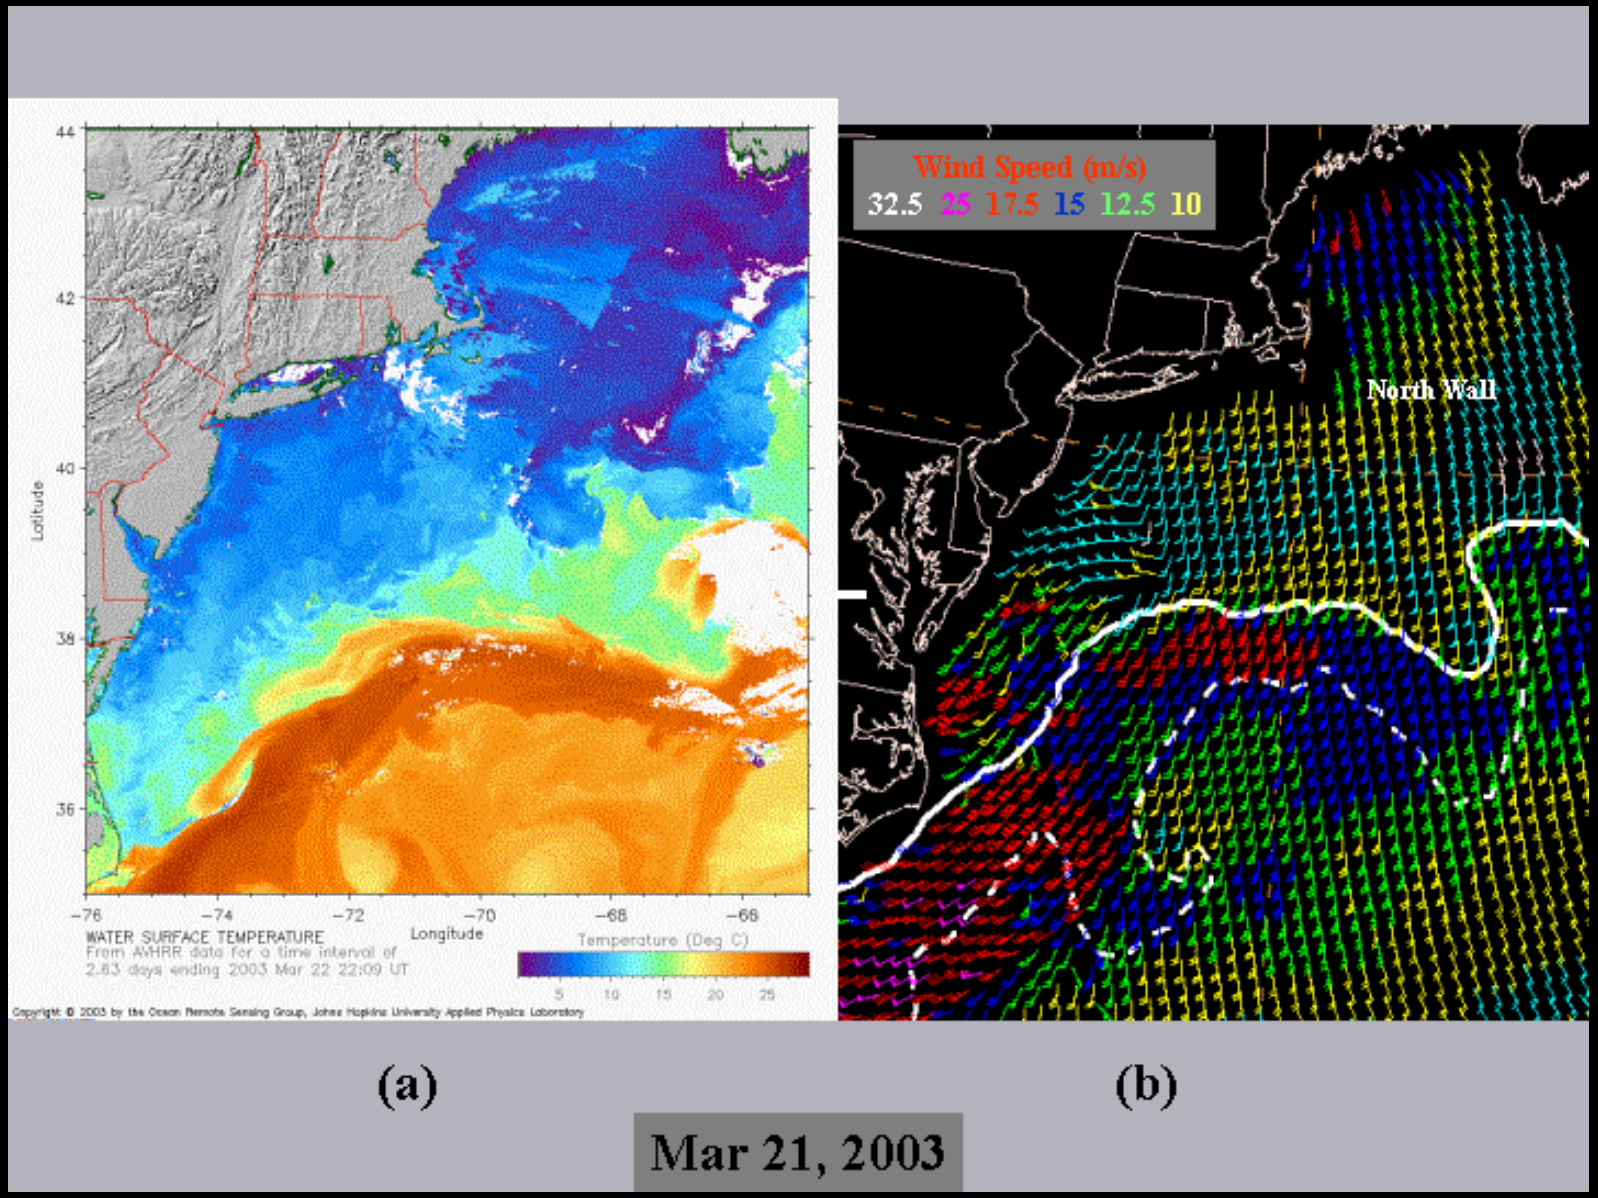
HYCOM Meeting, Oct. 27-29, 2004, RSMAS, Miami, FL

Ocean Prediction Center

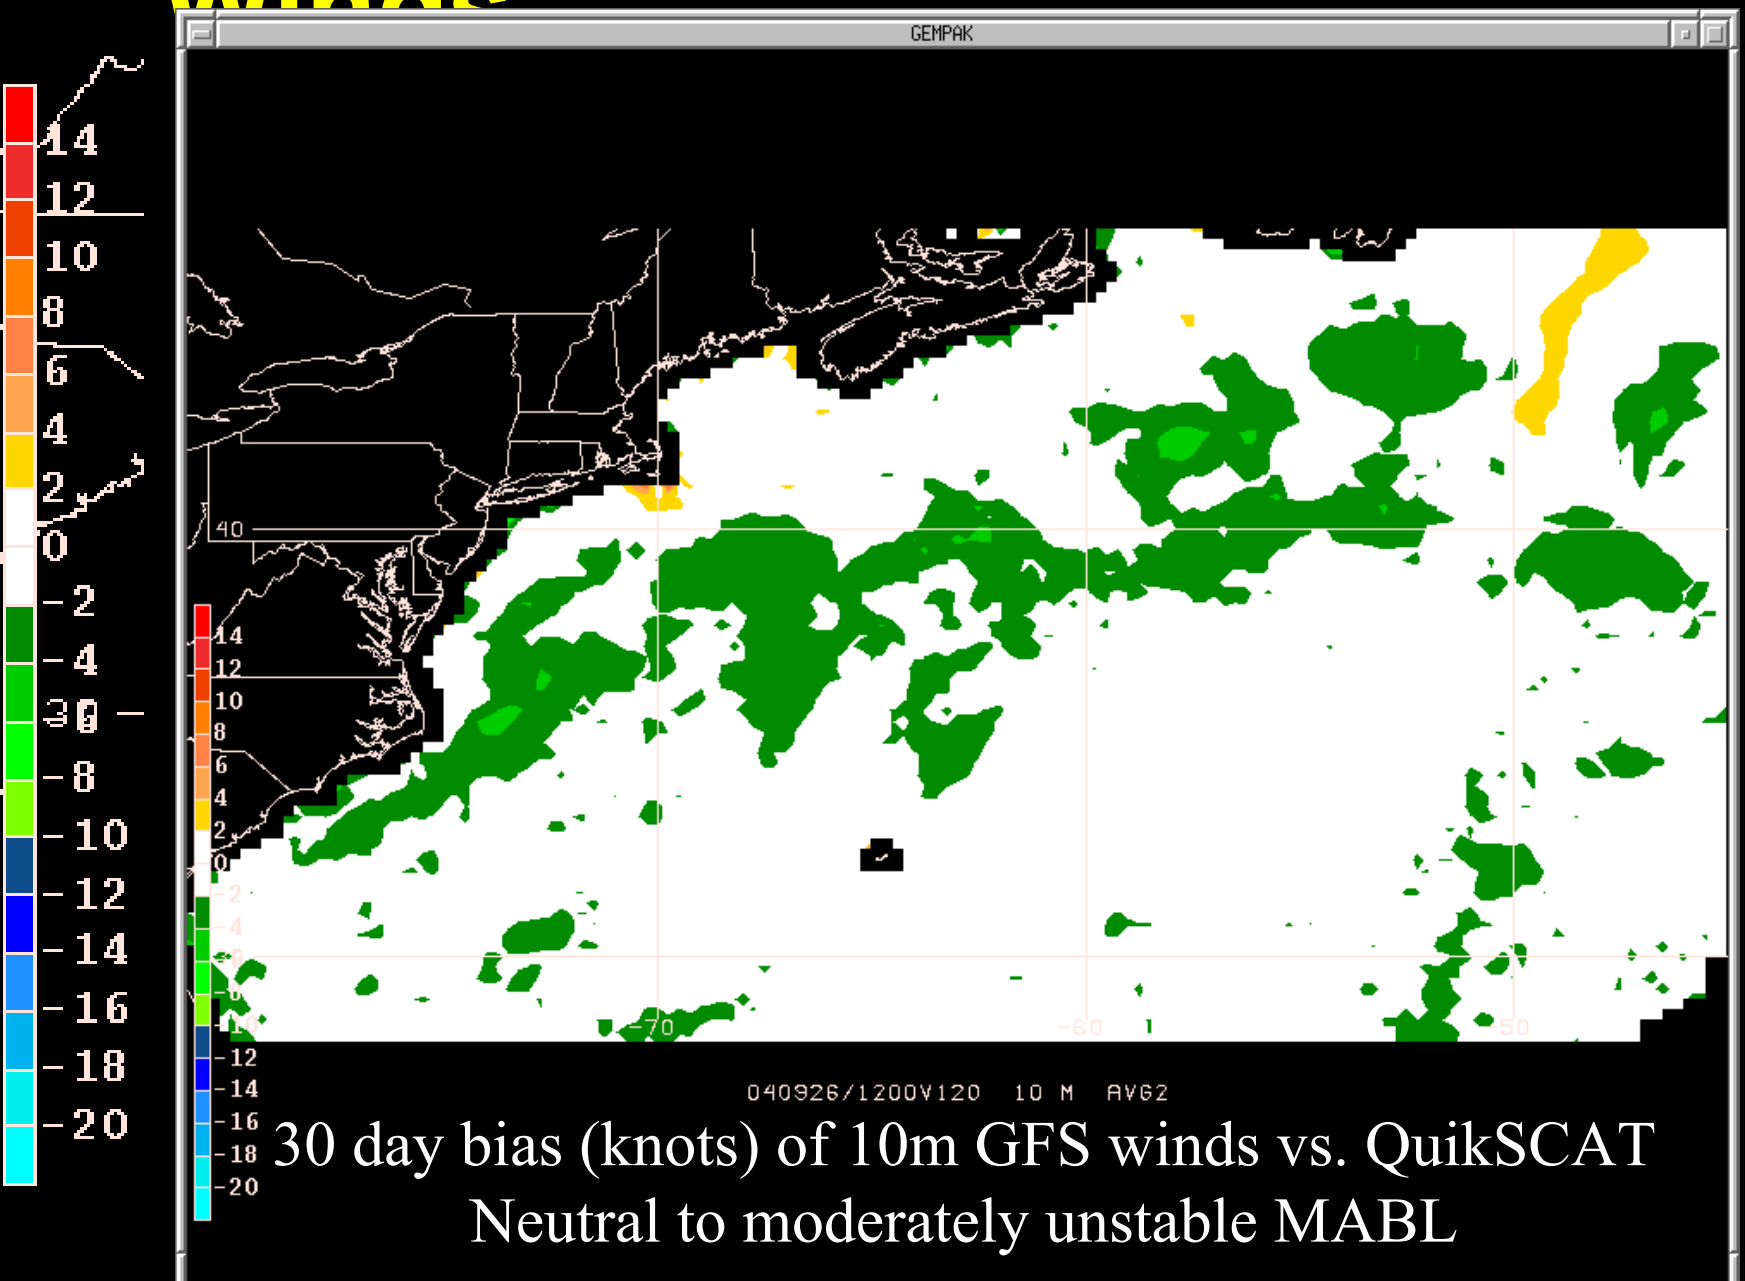
- *Responsibility, Motivation, Mission*
  - *Operational forecast center*
  - *Wind and waves*
- *Forecasting and Analyses to 5 Days*
  - *High Seas and Offshore Zones*
  - *Weather Fax Products*
  - *Storm, Gale, Hurricane Warnings*

Ocean Prediction Center

The Gulf Stream: Data



The Gulf Stream: GFS 10m Winds

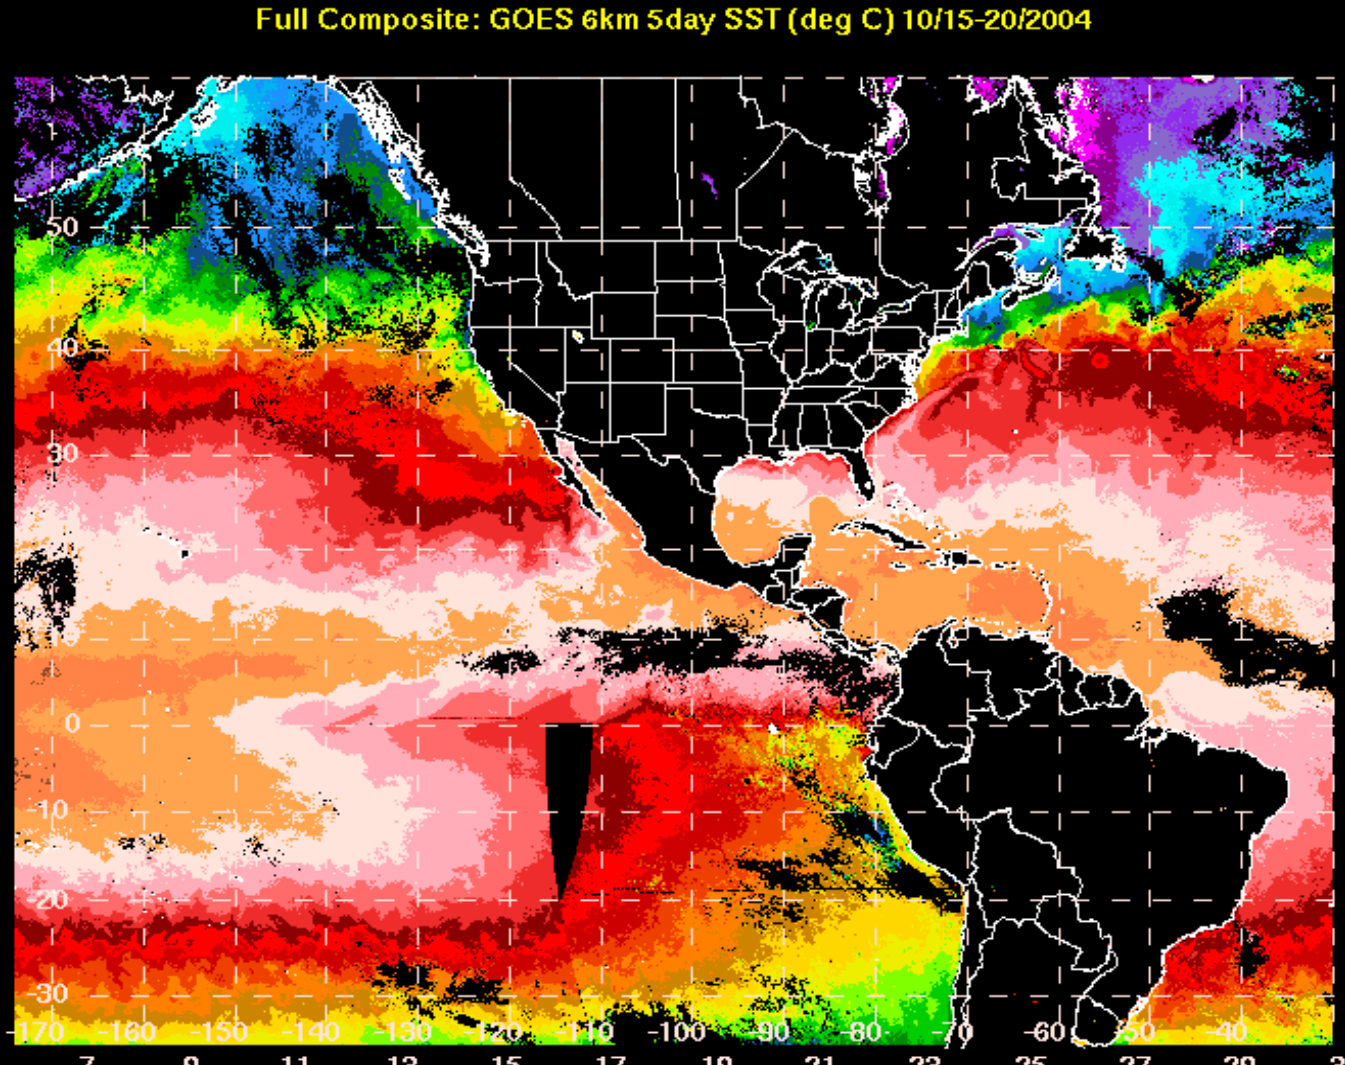


30 day bias (knots) of 10m GFS winds vs. QuikSCAT

Neutral to moderately unstable MABL

Current Status: SST

- *GOES (6km resolution), Infrared*



Future SST Products

- *POES (1km or 4km), Advanced Very High Resolution Radiometer (AVHRR)*
- *MODIS (1km), Moderate Resolution Imaging Spectroradiometer (MODIS), NASA AQUA/TERRA*
- *TMI (30 km), TRMM's Microwave Imager (TMI), NASA Tropical Rainfall Measuring Mission (TRMM)*
- *Mixed GOES/POES, IR/Microwave products*

Current Status: Models

- *Accurate forecast model fields are needed for the protection of life and property at sea and the enhancement of economic opportunity*
- *Comparison of HYCOM (NCEP AOFS) output to:*
  - *Observational data*
  - *NCEP Regional Ocean Forecast System (ROFS)*
  - *NCEP Global Forecast System (GFS)*
  - *Eta*

Current Status: Model SST

MODEL SEA SURFACE TEMPERATURE: COMPARISON and EVALUATION

*** Experimental Product ***

NAOFS Evaluation

- For the evaluation, we are developing a variety of products including N-AWIPS fields and web-based image comparisons; these will aid in examining ocean features across multiple datasets.
- The OPC hopes to use the NAOFS output fields to improve existing forecasts of winds and waves, and as a basis for an expanding suite of oceanographic products.

Summary

- Status – Tooling up for evaluation
  - GOES SST (starting place)
  - Additional SST fields (microwave, POES)
- ROFS data assimilation
  - Very positive with AVHRR and GOES SSTs
- NAOFS focus initially on features
  - Analyses
  - Forecasts
